

Hello,

Attached is the schedule for August, I was unsure about the time of the next shrub pass and just estimated the dates. That crew is falling behind schedule from rain days.

Artistree is working the crews overtime and adding more people to try and catch up but Mother Nature ultimately makes that decision and we do the best we can.

To supplement the shrub crew the weed control crew will be spraying the berms and common areas and any weeds inside and outside the gates.

In August the shrub crew will focus on trimming the Jatropha trees/shrubs, weed control, lifting trees from the ground and any special requests.

They will be trimming more common areas, the berms and outside the walls, and inside the walls.

The irrigation is being worked on by the pump maintenance company, they are making repairs and performing preventative maintenance. The rain gauges have been activating and shutting down the system on

The days that we receive rainfall. We will be doing irrigation work orders when the system is back up and running after this week.

Pond trimming is being rotated on a weekly basis to maintain the buffer height and the buffers are starting to fill in and do the job of protecting the pond banks.

Turf fungus continues to be a problem, if you see spots on the grass blades or browning, please call Lighthouse, the tech can evaluate and treat as needed.

If you have any special trimming requests, pest problems or turf issues, please contact Lighthouse and they can submit a work order and I will make sure it gets allocated to the proper crew.

Thank you,

Ginger
